

`denovo\_401` binds NR4A3 most tightly in both receptor frames
(selectivity direction robust; margin frame-dependent — §2.6)

Values from manuscript §2.6 (committed MM-GBSA runs: release 28518978321, metad 28473682532/28480041030). Single-trajectory GB-implicit MD, not FEP; magnitudes inflated (no entropy/ensemble) — read $\Delta\Delta G$ direction, not Kd.
