

denovo_401's decoy-null result is receptor-frame-dependent (§2.6)

Grey band = decoy null (38 non-NR4A marketed drugs, same dock→multi-snapshot MM-GBSA funnel), 0→95th %ile; dotted whisker → max decoy. Diamond = denovo_401 ± SD.
Values from manuscript §2.6 (committed MM-GBSA runs). The null controls the scoring step, not the generative step; single-trajectory GB-implicit, not FEP — read direction/robustness, not affinity.
