

Every tumour, on both platforms. Bars are medians.

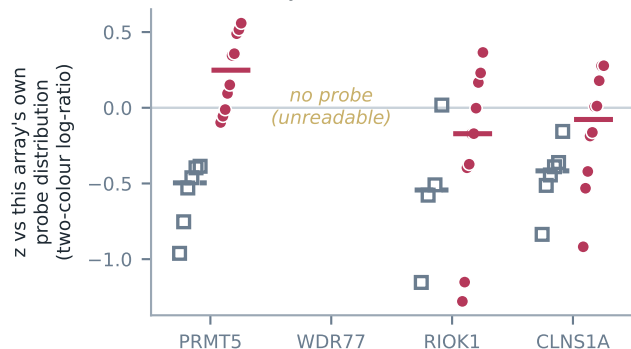

PRMT5 methylosome — GSE24369 / GPL6244

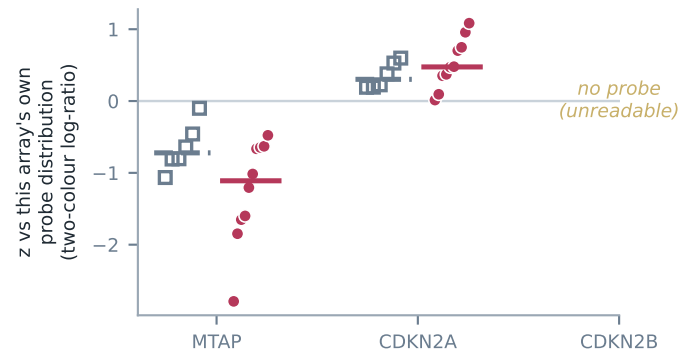

MTAP / CDKN2A / CDKN2B locus — GSE24369 / GPL6244

PRMT5 methylosome — GSE4303 / GPL3290

MTAP / CDKN2A / CDKN2B locus — GSE4303 / GPL3290

The two platforms are not on a shared axis: one is single-channel intensity, the other a two-colour log-ratio.
A gene with no probe is marked unreadable, which reflects the instrument rather than the absence of expression.
