

Transcript provenance changes EMC antisense comparisons

USZ20 model annotation

EWSR1 e13 / NR4A3 e2

ENST00000414183.2 / ENST00000330847.1

Same reference boundaries

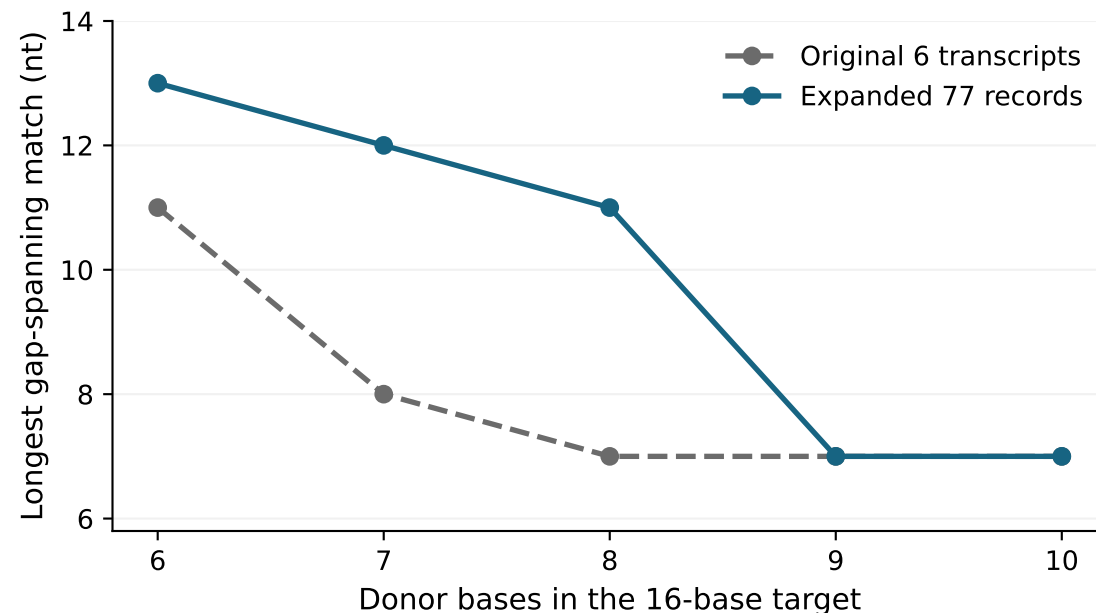

EWSR1 e12 / NR4A3 e3

NM_005243.4 / NM_006981.4

USZ20: reference reconstruction

USZ22: exact RNA junction unresolved

TCF12 junction: five binding positions

9 of 35 source-linked designs gain longer matches with added parent isoforms.

Sequence comparisons do not establish RNA cleavage or biological selectivity.
